

Get started with your SmartRock® sensors in these easy steps

1 Remove the temperature probe from the sensor to activate

2 Add the sensor to your project by scanning the QR Code

3 Assign the sensor a name in the mobile app and on its label

4 Install the transmitter on rebar no more than 2 inches (5cm) from concrete surface

5 Pull strap tight over the installation hook and fold remaining strap over

6 Secure the cable and temperature probe below the rebar

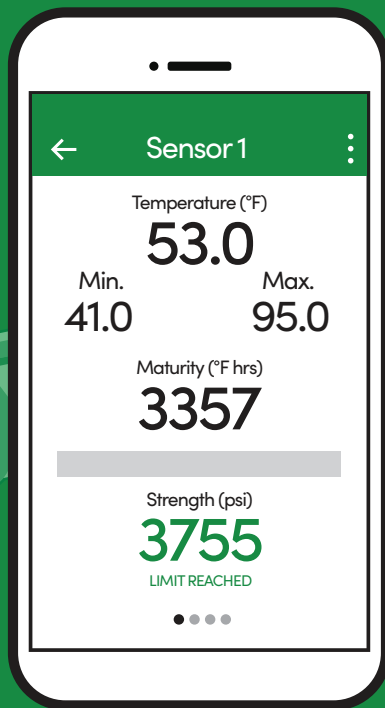

7 Pour concrete and monitor results in the mobile app or remotely with SmartHub™

 Using Giatec SmartRock® sensor in manners or conditions other than specified may cause damage to the sensor, compromise its safety or performance.

GIATEC SmartRock®

The World's #1 Wireless Concrete Sensor
